

# HURSTBRIDGE STATION

## New car park

Construction underway from February to mid 2020

### About the works

The Victorian Government is building up to 120 new car parking spaces at Hurstbridge Station.

The new spaces will be built along Graysharps Road on the gravel area west of the rail line.

The car park will include lighting and CCTV to improve safety, new footpaths to improve pedestrian connections and additional accessibility parking. Cyclists will also benefit from the construction of a new Parkiteer.

### What's happening?

Construction will start in February 2020 and is expected to be completed by mid-2020.

Most of the work will be contained within the site boundaries. Cars currently using this area will need to find alternative parking while the project is underway.

Train schedules and travel times will not be impacted by construction. For your safety please follow the directions of signage in place.
