

# SANDOWN PARK STATION

## Car park upgrade

Construction underway from February to mid 2020

### About the works

The Victorian Government is delivering more than 400 upgraded and 100 new commuter car parking spaces at Sandown Park Station.

The new and upgraded spaces will include lighting and CCTV to improve safety, and there will be new footpaths to improve pedestrian connections and additional bicycle parking for cyclists.

### What's happening?

Work will be carried out over three stages. See above map for details.

Parking will be opened as the project progresses through each stage; maximising the spaces available for commuters.

Works will start on stage one in February 2020 and the project is expected to be complete in mid 2020.

Station users will be notified ahead of major changes to car parking as we progress with construction.
