Telecommunications for the Victorian Government

Reliable, secure, and scalable

In a world where connectivity is essential, VicTrack provides Victorian Government organisations with robust, high-performance telecommunications solutions. As a government-owned provider, we understand the need for secure, reliable, and scalable communications infrastructure to support communities and essential services.

Our extensive fibre network, coupled with our partner wholesale network, is purpose-built for government and transport operations, and delivers fast, secure, and cost-effective connectivity across Victoria. Whether you need high-capacity data links, secure network solutions, or future-ready communications technology, VicTrack is your trusted partner in building a more connected and resilient Victoria.

VicTrack

Internal shared service provider

VicTrack is an internal shared service provider, which means government agencies can use VicTrack as a telecommunications provider without needing to apply the Victorian Government Purchasing Board (VGPB) supply policy framework or seeking an exemption from the State Purchase Contract.

Transform customer experience and service delivery

VicTrack works closely with our customers to design services that solve customer problems or meet specific needs.

Our fibre network and solutions are enabling connectivity to open new opportunities for state and local government. Our infrastructure plays a key role in helping to securely deliver government services to businesses and communities across the state.

From public safety to community engagement, customer experience and service delivery, VicTrack empowers your organisation to focus on your mission and exceed customer expectations.

VicTrack supplies a comprehensive range of telecommunications products and services to meet the various needs of government organisations.

Enterprise Internet

Delivered over VicTrack's reliable, resilient and secure network, our high-speed, uncontended Enterprise Internet service offers speeds from 20Mbps to 10Gbps to support your business needs.

Wavelength

VicTrack's transmission network is designed to deliver outstanding performance and is capable of handling service speeds of up to 100Gbps, providing dedicated, high-speed data connections, and allowing multiple data streams to be transmitted simultaneously.

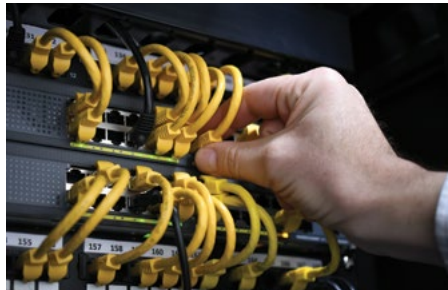

Dark Fibre

VicTrack's Dark Fibre is fast, safe, and private. It's a highly reliable way to keep things connected smoothly and securely. VicTrack's dedicated fibre links can carry virtually unlimited bandwidth.

Data Centres

The VicTrack Data Centre ecosystem includes VicTrack data centres, co-location, and connections to all major commercial data centres in Victoria, enabling seamless data transfer with scalability and agility built in.

Ethernet

VicTrack's Ethernet service provides flexible bandwidth to support the needs of any organisation. The solution is easily scalable to accommodate multiple sites, bandwidth, and application requirements. We offer a range of service level and Class of Service options.

IPWAN

VicTrack provides reliable, secure, and high-speed WAN connectivity. This saves businesses large upfront equipment costs and ongoing operational and management costs. IPWANs can be easily reconfigured to adapt to changing business needs.
